

How can the robot sense students in the hallway and move? (use the internet to help you find your answer + include the URL)

Is a robot or a human a better choice to help students? Why? (use the internet to help you find your answer + include the URL)

If a robot was used in school to help disabled students, what would you make it look like? Would you make it look humanlike? Why or why not? (use the internet to help you find your answer + include the URL)

How will the robot's appearance influence how people interact with it? Will the robot have limitations?(use the internet to help you find your answer + include the URL)

On the internet, find me 5 websites that show 5 different ways robots being used in a school. Put the websites underneath this question + answer the following questions.

Website 1:

Title

School

What is the robot being used for?

Should we do that in Parsippany?

Website 2:

Title

School

What is the robot being used for?

Should we do that in Parsippany?
